PROFESSIONAL SUMMARY

Java Backend Developer with 4+ years of experience building scalable REST APIs, microservices and full-stack enterprise applications with Java, Spring Boot, Hibernate, MySQL, MongoDB and Angular. Delivered platforms serving 11 lakh+ customers and 12,000+ employees, cut a critical database operation from ~2 minutes to ~4 seconds, and integrated third-party services such as the WhatsApp Business API. Strong in performance tuning, production debugging and end-to-end feature ownership in Agile teams. Immediate joiner.

KEY ACHIEVEMENTS

- Scaled enterprise communication workflows to 11 lakh+ customers and 12,000+ employees.
- Reduced a critical MySQL-backed operation from ~1–2 minutes to ~4 seconds through query optimization.
- Improved PDF-to-Excel billing data accuracy from ~54% to ~89% with automated extraction and validation.
- Earned a Star Performer Award at Relanto for automation and engineering delivery.

TECHNICAL SKILLS

Languages: Java (7/8/17), SQL, JavaScript, TypeScript, HTML5, CSS3, Python (working knowledge)
Backend: Spring Boot, Spring MVC, Spring Security (JWT), Spring Data JPA / MongoDB, Hibernate, JAX-RS / Jersey, REST APIs, Microservices, Multithreading, Apache POI
Frontend: Angular, React, Syncfusion EJ2
Databases: MySQL, MongoDB, PostgreSQL; stored procedures, query optimization
Cloud & Tools: AWS (EC2, Lambda, S3, DynamoDB), Docker, Kubernetes, Kafka, n8n, Git, Maven, JUnit, Mockito, Postman, IntelliJ IDEA
Concepts: Distributed systems, distributed tracing, system design, asynchronous processing, Agile/Scrum, production support

WORK EXPERIENCE

ACT FIBERNET

Software Engineer — Apr 2024 – Present

- **Click-to-Call Platform:** Designed and built an enterprise Click-to-Call module (Java, Spring Boot, Hibernate, MySQL, Angular) serving ~11 lakh customers and 12,000+ employees; used asynchronous processing to keep high-volume workflows fast and scalable.
- **Performance:** Cut a critical operation from ~1–2 minutes to ~4 seconds by rewriting a MySQL stored procedure (joins in place of correlated subqueries), and shipped server-side-paginated Angular dashboards backed by new REST APIs.
- **Customer Communication:** Built a WhatsApp bulk-notification and payment-link automation (BSP API, MongoDB, Spring) reaching ~11 lakh customers, with audit logging and bulk data operations.
- **Bulk Upload System:** Delivered an Excel bulk-upload feature (Apache POI, Spring Boot, MySQL) with duplicate handling and concurrency-safe updates; authored API documentation and resolved a production 404 caused by Nginx upload limits.
- **Reliability & Automation:** Fixed a Spring Security session-expiry defect, built an internal ticketing app (Spring Boot, Angular, n8n) that automated manual workflows, and contributed to code reviews, testing and production support.

RELANTO

Software Engineer — Jul 2023 – Apr 2024

- **HRMS Platform:** Built Spring Boot microservices and an Angular front end for a workforce platform supporting ~15,000 employees, covering resource allocation, project mapping and SOW workflows.
- **AI-Assisted Matching:** Integrated AI-based resume analysis to match employee skills to suitable projects; recognised with a Star Performer Award for roster automation and mapping work.
- **Billing Automation (Fastly):** Developed Java extraction, validation and Excel-generation workflows that raised PDF-to-Excel billing accuracy from ~54% to ~89%.
- **Performance Tracing (Cisco):** Contributed to a distributed tracing engine, implementing Critical Path Analysis to pinpoint latency bottlenecks across microservices.

RENOVITE TECHNOLOGIES

Software Engineer — Mar 2022 – Jun 2022

- Developed Java / Spring backend features, REST APIs and integrations for an enterprise payments platform.
- Contributed to enhancements, defect fixes, testing and code reviews across the SDLC.

EDUCATION

DR. A.P.J. ABDUL KALAM TECHNICAL UNIVERSITY
Bachelor of Technology (B.Tech), Computer Science & Engineering 2022

ADDITIONAL

Certifications: Java Full Stack Developer Certification – Relanto
